

belulu® Rebirth

User's manual

Thank you very much for purchasing this product.
Please read this user's manual carefully before using this product.
There is a guarantee certificate at the end of this document,
so please make sure to store it in a safe place.

Please check the notice.

⚠ Notice

- Make sure to use the correct voltage, AC adapter, etc. by following the specifications in this document.
- When using this product, do not look directly into the LED light, or point it toward your eyes. Looking directly into the LED may be harmful to the eyes.
- Do not use this product if you find any problems with it, including any damages, faults, deformities, broken cables, etc.
- If you notice any smoke, offensive smell, abnormal heat, etc. coming from the product, turn off the power and stop using it immediately.
- Do not pull on the power adapter cable or touch the plug area with wet hands.
- Do not leave or use this product and the power adapter in places that may be subject to high temperatures, such as stoves, etc.
- Avoid using this product with wet hands, or when it is damp or covered in dirt, etc.
- This product is not waterproof. Never use this product in places with high humidity, such as bathrooms, etc. This may cause burns, electric shocks, or product faults.
- If you notice any abnormal effect on your skin, stop using this product and consult your physician.
- Look at the list below carefully, and do not use this product if any of those conditions apply to you.
- Never attempt to disassemble or reassemble or do any type of maintenance work on this product by yourself. This may cause the product or its accessories to become damaged or faulty. Any issues caused to the product or its accessories by these actions are not covered by the product guarantee, and the company shall bear no responsibility for them.

⚠ Caution

- Avoid using this product excessively on sensitive areas of your skin.
- If you feel any pain, etc. during use, move the 3D head away from your skin immediately.
- Do not subject the product to any strong actions such as by dropping or hitting it.
- The product is fully charged within approximately 4 to 8 hours. Do not continue to charge it once it is fully charged.
- Disconnect the charger cable from the product when it is not being charged.
- Do not wash this product with water. If dirty, take a damp cloth, wring it well, and use it to clean the product gently. Do not use solvents such as benzene, thinners, etc. to clean this product.
- Any injuries, faults, damages, etc. caused to the product due to your failure to follow the important notes and warnings stated above, any incorrect use or disassembly/reassembly of the product, or any maintenance work done by yourself, are not covered by the product guarantee, and the company shall bear no responsibility for them.

Available
(Charging required)

Charging
required

※Depending on the production period, the remaining battery level may be displayed immediately after a full charge, but this is due to a built-in program and there is no problem in use.

●Make sure to recharge the product in the following situations: if you are using the product for the first time after purchase, if you have not used it for a very long time, if its power seems low, or if it seems to work for short periods of time.

●Please turn the power off when you charge.

●Insert the charging cable's connector into the device's charging port and insert the AC adapter into a household power outlet.

●The charge notification light blinks with a red light.

※The device may become slightly hotter while charging; however, this is normal.

●The charging time and operating time will vary depending on how frequently the product is used.

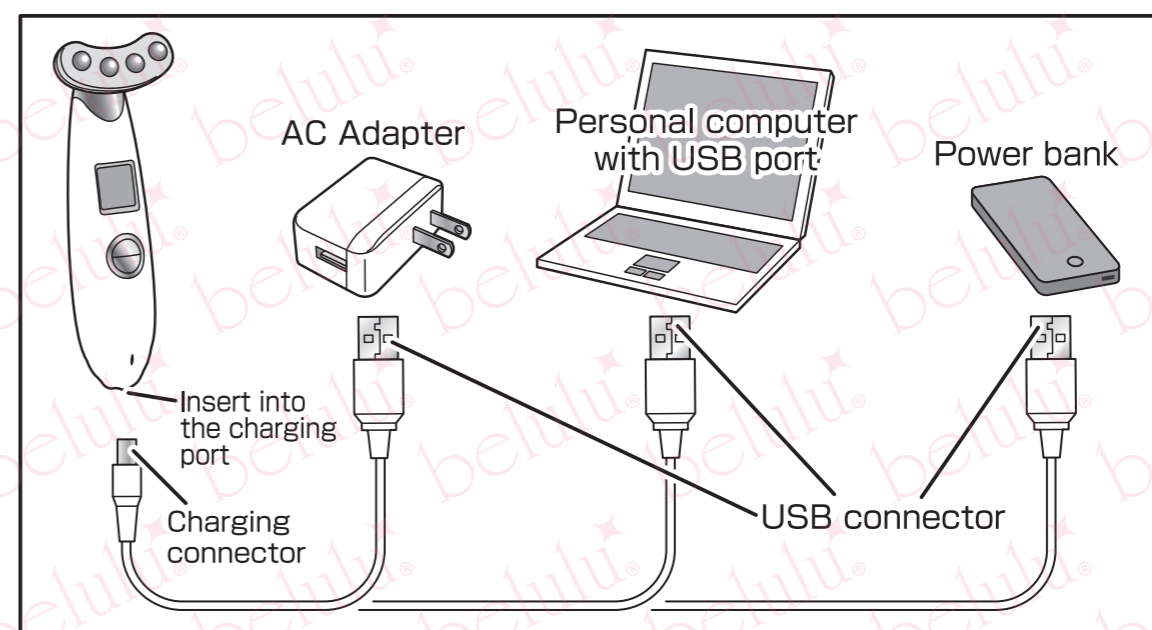

●The charging light goes off when the product is fully charged. Make sure to disconnect the cable once charging is complete.

●This product cannot be used while connected to the charging cable. Make sure to check that the charging cable is disconnected when using the product.

■The most suitable room temperature for charging is 15°C to 30°C. Charging the product at low temperatures may shorten its battery life, so make sure to charge the product at the appropriate temperature. In addition, the product's charging speed may decrease at approximately 0°C or less.

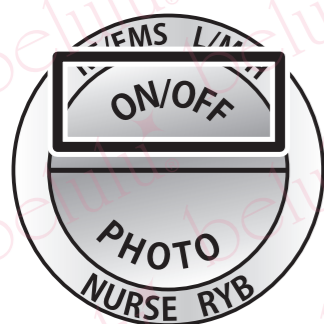

■In order to protect the built-in battery, make sure to charge the product once per month even when you are not using it for long periods of time.

■If the product's operating time seems short even though it has been charged correctly, the cause of this is likely to be the battery life.

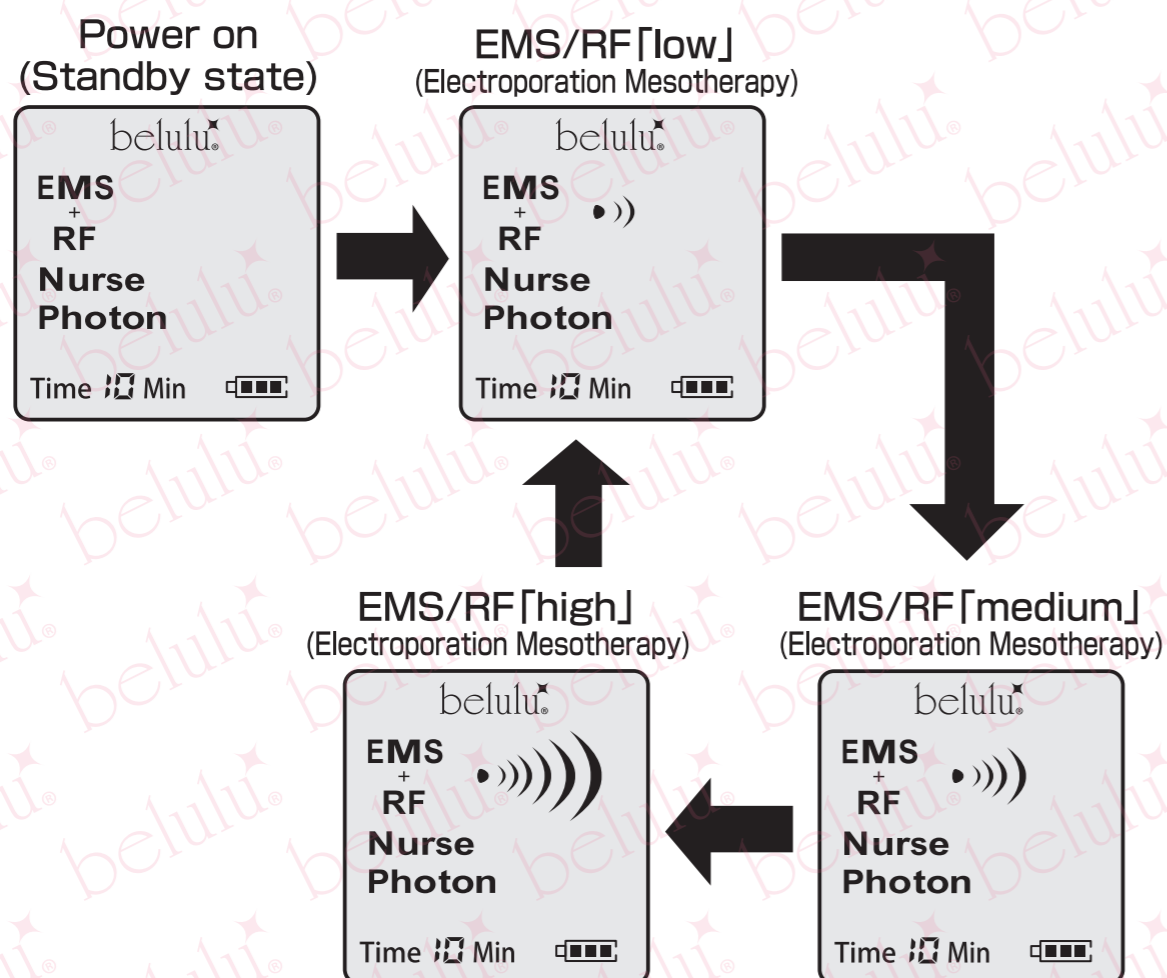

4 Operation

ON/OFF button

Please press the ON/OFF button to turn on the EMS/RF thermotherapy mode.

- Press the ON/OFF button over two seconds, the display will turn on and stand by state.
- Then press the ON/OFF button each time the mode will change; EMS/RF low → EMS/RF medium → EMS/RF high.

1. No sound and no vibration. It turns on automatically by setting EMS/RF.
2. It depends on the person but feel some stimulations.

Patch test

- Wash and wipe your inside of arm.
- Apply some facial lotion to a weak part of your skin, such as the inside of your arm, and try out all the functionality provided by the product as outlined on the next page.
- Once you have verified that you have had no adverse reactions, you can move onto your face care. If you do experience any abnormality on your skin, do not use the product, and make sure to consult our company or your physician.

6 Function and effect

The U-shaped head fits to your eyes, mouse and face line and it's effective for facial lifting.

【EMS】 Three times/week

The EMS stimulate your facial muscle and makes your face look smaller.
※RF works at the same time and can't use separately.

【RF thermotherapy】(Radio Frequency) Three times/week

1 MHz high frequency will give your skin warm massage, reduce wrinkles, restore skin tightening, and lift your skin. It helps to improve sluggish blood circulation.

※EMS works at the same time and can't use separately.

【Nurse/Vibration massage】 three times/week

Vibration can make the nutrition and moist penetrate to the deep skin for effective absorption and moist replenishment, accelerate skincare absorption.

【Electroporation】 Three times/week

The unique deeper stimulating effect which can stimulate regeneration of collagen, promoting deep moistening of skin and has remarkable effect of improving skin and skin color. It is preferred to operate with beauty serum.

※Electroporation works at the same time by operating EMS/RF and can't use separately.

【Mesotherapy】 Three times/week

Mesotherapy is a non-surgical skin rejuvenation treatment aimed at diminishing problem areas. It can instantly improve dull, tired looking skin and superficial wrinkles but can also help to improve sluggish blood circulation.

※Mesotherapy works at the same time by operating EMS/RF and can't use separately.

【LED photon】

The care by LED light.

Each LED light color has different benefits.

You can change the color as you like.

Red LED

630nm

Will stimulate the production of Collagen is an essential protein used to repair damaged tissue and to replace old tissue. Best for fine lines and will also help to reduce large pores.

Blue LED

415nm(±10nm)

Bacteria in pimples contain Porphyrins; able to kill Porphyrins due to the high affinity. The blue light furthermore has calming action which is very effective for hypersensitivity.

Yellow LED

590nm(±10nm)

Can balance color pigment, reduce fine lines, nutrient aging skin, speed up the healing process of the wound, and lighten the scare.

All colors

Red, Yellow and Blue turn on at the same time.

Combination

You can use some modes at the same time for time saving.

EMS/RF thermotherapy

+

Nurse/Vibration massage

You can choose the EMS/RF level from low, medium and high.

EMS/RF thermotherapy

+

LED photon

You can choose the EMS/RF level from low, medium and high and can choose the LED color.

Count down timer

Power on and the 10 minutes timer stars. It turns off after 10 minutes automatically.

Please use the timer as a guide.

Select the mode and it indicates 'Time 10 Min'. It counts down every minute.

Caution

- This product is not waterproof. Never use this product in places with high humidity, such as bathrooms, etc.
- Do not use this product in places that may be subject to high temperatures, such as stoves, etc.
- Do not watch the LED light directly for a long time.
- When doing your own skin care, make sure to use a gel or beauty cream. If you were to use this product on dry skin, it could cause the 3D head to move less smoothly, potentially damaging your skin. No need to apply the beauty serum, when you use only LED photon care.
- Grip the Ion bar.
- Apply the head area onto the skin by going down in a straight line. Also, do not press it down or rub it hard along the skin. Make sure to move the head gently and smoothly along the skin.
- Remove the all watch and jewelries
- If you notice any abnormality on your skin while using the product, or if you feel that it does not suit your skin in any way, stop using it immediately, and contact us or consult your physician.

【Point】

Slide the 3D head to each part as below image.
Take a long care where you worry dryness, especially around the mouth.
We recommend to add gel or facial lotion, beauty serum for each time.

【お手入れ時間の目安】

Upper times are only a guide.
Take care in accordance with the situation

Slide, 'from bottom to top' or 'from inside to outside'.

【Around mouth】

from chin to cheek and from under nose to cheek.

【Cheek】

From nose to temple

【Nose】

From top to bottom, and round.

【Forehead】

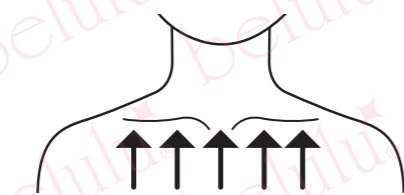

From top to bottom and right to left.

If this is the point where you are finishing up with your care routine, carefully blend in the rest of the gel, facial lotion, or beauty serum on your face, and then seal it with a milky lotion or beauty cream to compensate for the fat content.

Make you décollete youthful

① Apply plenty of serum and beauty gel to the décollete part.

② Slide to lift from the top of the bust toward the clavicle.

③ Slide around the clavicle and bust from the inside to the outside.

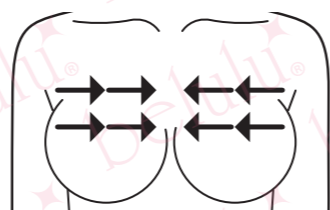

For a plump bust with elasticity

① Apply plenty of beauty gel or bust-up gel to the bust, and slide from the bottom toward the bust top.

② Glide from the outside toward the bust to collect fat on the back and side.

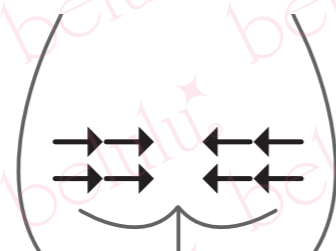

③ Slide the top of the bust from the outside toward the center.

For a glossy hip

① Apply a lot of beauty gel on the hip and slide from the bottom toward the hip top.

② Slide it from the outside to the inside.

8 After care

- Turn off the power.
- Blend in the rest of the gel, facial lotion, or beauty serum on your face.
- Seal it with a milky lotion or beauty cream to compensate for the fat content.
- Wipe the gel or facial lotion, beauty serum on the 3D head and keep it clean.
 - ※ Do not wash this product with water. If dirty, take a damp cloth, wring it well, and use it to clean the product gently.
 - ※ Do not use solvents such as benzene, thinners, etc. to clean this product.
- Keep it in a box and avoid dust.
- Avoid storing in places with high temperatures, high humidity, or under direct sunlight, as well as places that are highly dusty or within the reach of children.

9 Q&A

The device doesn't work.

● It may be out of charge.

The rechargeable battery has the peculiar attribute of losing power a little at a time even when not turned on, and there may be times when it has no charge.
Recharge for one hour and try again.

● Press the ON/OFF button over two seconds, the display will turn on and standby state.

【Still have problem?】

We have taken early failures and breakdowns of this product into consideration, so please contact us.

Not charged, not stable charging.

● The cable is connected securely?

It can't be charged if it isn't energized.
Please refer the 'Charging' and check the charging port and connect securely.

【Still have problem?】

We have taken early failures and breakdowns of this product, cable or battery into consideration, so please contact us.

EMS/RF doesn't work.

● Check the operation.

EMS/RF doesn't make some sounds or vibration.
Please refer to '5. Before you use' and 'EMS/RF thermotherapy mode' and check the operation.

【Still have problem?】

We have taken early failures and breakdowns of this product into consideration, so please contact us.

Electroporation and mesotherapy don't work.	<p>●Check the operation. Electroporation and mesotherapy don't make some sounds or vibration. Please refer to '5. Before you use' and 'Electroporation Mesotherapy' and check the operation.</p> <p>【Still have problem?】 We have taken early failures and breakdowns of this product into consideration, so please contact us.</p>
The display light turned off	<p>After a certain time, the display light will be turned off. Push the any button one more time.</p>
Display is not visible and LED light is weak.	<p>●Low charge If its power seems low, please recharge.</p> <p>【Still have problem?】 We have taken early failures and breakdowns of this product into consideration, so please contact us.</p>
During use, there is a "beep" and it powers off.	<p>It powers off after 10 minutes automatically.</p>

When in use, my hands will tingle as if it is short circuiting.	<p>●This is not a short circuit. A tiny amount of electricity is flowing through the metal handle of this device, and it is meant to pass through your skin's barrier to permeate its beautifying elements deep in the skin, so it is possible depending on the person that this tiny electric current will be felt. This small electric current is harmless to your body, but if you are concerned, use it by turning down the strength level of the ultrasonic waves.</p> <p>【Still have problem?】 Please contact us. Within 7 days from arrival.</p>
---	---

Q&A

Q. Must I use the beauty serum?

A. We recommend thick beauty serum which contains active ingredients blended, especially 'belulu b2 bottle'.

Q. Is it safe to use if I'm pregnant?

A. You can use it even if you are pregnant, but your skin is in a delicate condition from the hormonal imbalance during pregnancy, so depending on the timing when it is used, it is possible in rare cases that it will harm your skin. It is recommended that you make sure to consult your physician and use it while observing how it affects your skin.
(The beauty device's functions or the ingredients from the beauty serum have no effect on a mother's body or a fetus, so please don't worry about that.)

Q. What is the 3D head made from?

A. It is stainless.
It is strong against cracks, corrosion, or rusting, and it is hard for it to trigger allergies. It may not be difficult for it to trigger allergies for everyone.
Please do a patch test.

Q. What should I do if it isn't suitable for my skin?

A. We will refund within 7 days from arrival, subject to shipping fee.

Q. Should I take time every day to perform this care routine?

A. This device's built in functions demonstrate highly beautifying effects, but overuse will put a burden on your skin. So as not to burden your skin during use, abide by the frequency of use as listed in this manual. Frequent use every day will not produce immediate effects, it is important to carefully continue to use it on a daily basis.

Q. Even after using it, I can't feel any of its effects.

A. How the effects materialize is different depending on the person. This device was manufactured with the intention of it being used at home, so it does not have the same power as from a beauty salon, and there is no immediate effect. By continuing to use it every day, you will start to see its effects.

If you have any questions or concerns,
please feel free to contact us.
